Digital Power®
Flexible Power Solutions

UAV MOBILE POWER SYSTEMS

UAV Mobile Smart Battery Charging & Power System

Integrated power for mobile UAV operations

UAV-DC28-10CHG

Charge up to 20 UAVs

Mobile charging magazine simultaneously charges UAVs carried aboard a tactical vehicle.

Rooftop launch & recovery

Tactical vehicle equipped with a rooftop UAV launch and recovery deck.

Fit the support platform

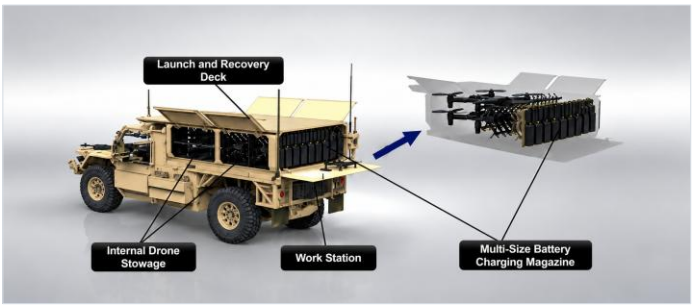
Designed for vehicle, station and trailer integration.
Combine essential power functions in one integrated solution.

An integrated power conversion, battery charging, and energy storage solution designed for vehicle-mounted and mobile UAV operations.

The system incorporates a 24V-to-28V DC-DC power converter, smart battery chargers, and rechargeable batteries to support UAV battery charging and power management in tactical and mobile deployment environments.

The solution is designed for integration into UAV launch and recovery vehicles, mobile charging stations, and trailer-mounted UAV support systems.

VEHICLE INTEGRATION



TRAILER INTEGRATION
