

Counter-UAS & Air Defense

Mission-critical defense applications require **rugged, high-performance** interconnect solutions for **reliable** operation in **demanding environments**.

Amphenol Military and Aerospace offers a broad portfolio designed to meet those needs.

Amphenol Aerospace

EMI Filters

Integrated EMI protection for improved signal integrity

Amphenol Canada

Micro-D

M83513, Custom, Circular

Compact connectivity for mission electronics

Amphenol Canada

Cable Assemblies

Enables efficient signal and power transmission

Times Microwave

LMR®-400

Low-loss RF cable for long-distance signal transmission

Military High Speed

Ethernet Switches

Secure, high-speed networking for mission-critical systems

Military High Speed

Media Converters

Bridges fiber and copper network communications

PCD

Nano Pegasus

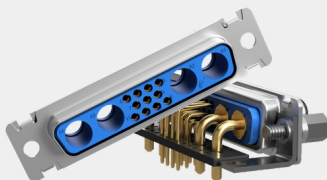

High-speed performance in an ultra-miniature composite connector

PCD

SPIN TACT™

Continuous rotation for radar and sensor applications

Positronic

D-Sub

Standard, High, Combo-D

Flexible power and signal connectivity

Positronic

Scorpion

Configurable power and signal layouts

SV Microwave

PCB Connectors

Board-level RF connectivity for high-frequency applications

SV Microwave

VITA Connectors

67.1, 67.2, 67.3

High-density RF connectivity for open architecture systems
