

Space

Low Earth Orbit

Communications, Earth observation, and navigation platforms require lightweight, high-performance interconnect solutions.

Amphenol Military and Aerospace offers a broad portfolio designed to meet those needs.

Amphenol Aerospace
Space VPX

Open architecture for mission computing

Amphenol Aerospace
Deep Space 38999

Built for extreme environments with reliable operation down to -195°C

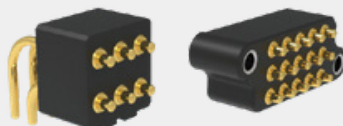

Amphenol Canada
Micro-D
M83513, Custom, Circular

Compact connectivity for mission electronics

Amphenol Canada
Z Series

Lightweight space-grade rectangular connectivity

Nexus
Spring Loaded Pogo Pin

Dynamic board-to-board connections

PCD
Carbon PEEK
Thermoplastic Solutions

Strong, lightweight structural solution

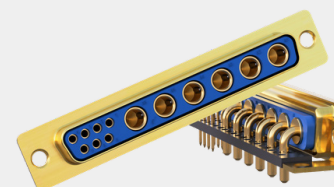

Positronic
SP Max

EMI-protected power and signal connectivity

Positronic
Mach-D

High-density connectivity in compact systems

Positronic
D-Sub
High Performance

Designed for spaceflight applications
