

Missiles & Hypersonics

Extreme speeds and harsh conditions require rugged, reliable connectivity.

Amphenol Military and Aerospace offers a broad portfolio designed to meet those needs.

Amphenol Aerospace

Series 5 *High Temperature*

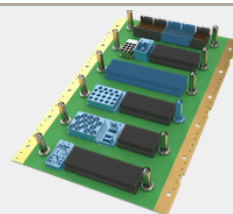

Withstands extreme operating temperatures

Amphenol Aerospace

38999 Lanyard

Reliable breakaway performance

Amphenol Aerospace & SV Micro

VITA & SOSA Solutions *Open.Tech*

Open architecture design tool

Commercial Air Division (ACAD)

Dualock

High-vibration connector retention

Amphenol Canada

Micro-D *M83513, Custom, Circular*

Compact connectivity for mission electronics

Amphenol Canada

Nano-D *M32139, Custom, Circular*

Maximizes density in lightweight designs

PCD

Nano Pegasus

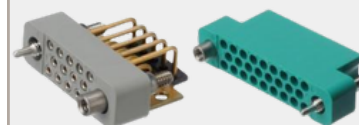

Ultra-miniature high-speed connectivity

Positronic

D-Sub *Standard, High, Combo-D*

Flexible power and signal connectivity

Positronic

Mini-Rectangular *SGMC, SGM, SMPL*

High-density power and signal distribution
