

Space Launch Systems

Extreme vibration, shock, and thermal conditions require rugged, lightweight, and high-performance interconnect solutions.

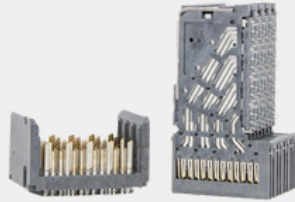

Amphenol Military and Aerospace offers a broad portfolio designed to meet those needs.

Amphenol Aerospace

D38999 Series III **TV Breakaway**

Rapid disconnect for critical systems

Amphenol Aerospace

VITA Connectors

Modular connectivity for open architecture systems

Amphenol Canada

ARINC 600

High-density rack-and-panel connectivity

Amphenol Canada

MMA Series

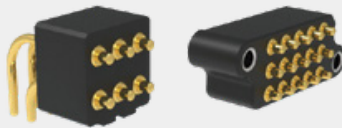

Compact connector for harsh environments

Military High Speed

High Density **Connectors and Cable Assemblies**

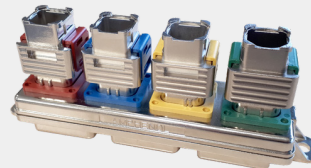

Maximizes I/O capacity in compact systems

Nexus

Spring Loaded Pogo Pin

Board-to-board connectivity for high vibration

PCD

SIM EN4165

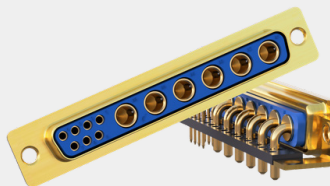

Simplifies complex interconnects with a modular, customizable design

PCD

USB3FTV

Rugged USB Type-C connectivity for high-speed data

Positronic

D-Sub **High Performance**

Designed for spaceflight applications

Positronic

Mach-D

Precision-machined for harsh environments

Positronic

SP Max

EMI-protected power and signal connectivity

SV Microwave

PCB Connectors

Precision board-level RF connectivity
