

# Maritime Surface

From communications and radar to propulsion and power distribution, modern vessels rely on **rugged, reliable** technologies to keep critical systems operating.

**Amphenol Military and Aerospace** offers a broad portfolio designed to meet those needs.

**Amphenol Aerospace**  
**Aquacon**

Pressure-sealed for underwater connectivity

**Amphenol Aerospace**  
**Hermetic Connectors**

Leak-proof connector solutions

**Amphenol Aerospace and ACAD**  
**Power Products**

High-current power solutions in a compact footprint

**Commercial Air Division (ACAD)**  
**Duallock**

High-vibration connector retention

**Amphenol Canada**  
**ARINC 600**

High-density rack-and-panel connectivity

**Amphenol Canada**  
**MMA Series**

Blind mate connectivity for modular designs

**Military High Speed**  
**Ethernet Switches**

Rugged high-speed Ethernet connectivity

**Nexus**  
**RANGER Seal**

Sealed connectivity with IP68/IP69K protection, 3000 hour salt spray

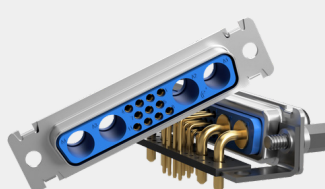

**PCD**  
**M28840**

High density for mission critical systems

**PCD**  
**SPIN TACT™**

Continuous rotation capability for power, signal, and data

**Positronic**  
**D-Sub**  
*Standard, High, Combo-D*

Flexible power and signal connectivity

**SV Microwave**  
**RF Cable Assemblies**

High-performance RF signal transmission
