SURE-SEAL CONNECTIONS

POWER & LIGHT

THROUGH THE ELEMENTS

Connections Made for the Outdoors

Moisture, severe weather, vibration, and environmental exposure can create problems anywhere electrical systems operate outside the protection of four walls. Sure-Seal connectors help keep critical connections sealed and protected in applications built to work through it all.

Three Applications. One Tough System.

OUTDOOR AND ARCHITECTURAL LIGHTING

- IP67-rated protection against water and moisture
- Resistant to UV light and ozone exposure
- Helps maintain connection integrity through changing weather conditions
- Ideal for landscape, architectural, and exterior lighting

HEATING, VENTILATION, AND AIR CONDITIONING SYSTEMS

- Operating temperature range of -40°F to +221°F
- Designed for high-vibration environments
- Helps withstand condensation and changing temperatures
- Ideal for rooftop units, condensers, controls, and sensors

INDUSTRIAL ELECTRICAL SYSTEMS

- Resistant to petroleum derivatives
- Designed for exposure to chemicals and steam
- Built for harsh industrial operating conditions
- Ideal for controls, motors, pumps, sensors and electrical equipment

A Range of Electrical Applications

From compact signal connections to higher-power requirements, Sure-Seal offers rugged connector options designed to help protect electrical systems operating in demanding environments.

Choosing the Right Connector and Material

MINI

STANDARD

POWER

Nitrile
For exposure to fuel, engine oil, and fluids.

EPDM
For ozone exposure and UV resistance.

Expertise in rugged applications

Proven reliability in harsh environments

Dedicated technical & customer support

Simple, hassle-free selection

The Sure-Seal Difference

Sure-Seal Connections® designs and manufactures rugged, high-performance interconnect solutions built for demanding environments. With decades of experience, we support applications across marine, agriculture, construction, mining, off-road equipment, ground transportation, and other harsh-environment markets.

Engineered for durability and dependable performance, Sure-Seal connectors help protect electrical connections from moisture, dirt, vibration, changing temperatures, and other environmental challenges.

From proven standard products to application-specific solutions, our team combines technical expertise, responsive support, and straightforward solutions to help customers find the right connection for the job and keep equipment performing where it matters most.
