

MMC

# MMC Serie

Compact Quick-Releasable Connector

... for a robust and ergonomic  
high speed data connexion !

Catalog

## ◆ Description

Bernier designed the MMC connectors specially for system in small spaces or wearable equipments. The design is tough in order to go over harsh environments. It exists today in the 24 contacts version to be used for high speed data transmissions.

MMC

## ◆ Applications

Radios

Accessories

Intercoms

Crypted data

Quick-releasable

Compact

Stainless steel

EMI RFI protection

Robust

Watertight

Optronic devices

Weapon systems

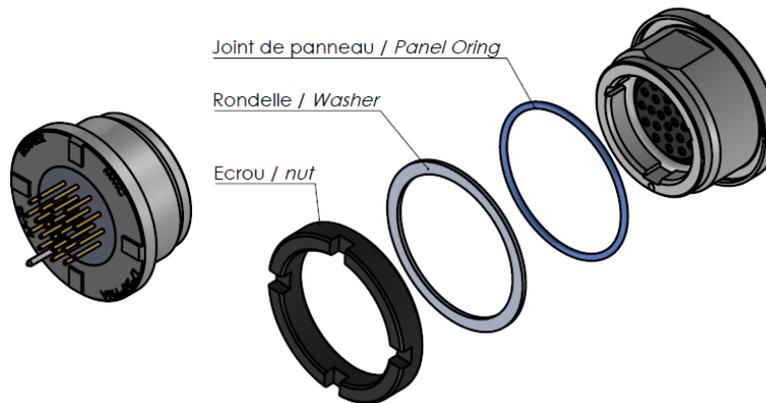

Rugged computers

Tactical equipments

## ◆ The Right Solution for your projects

MMC connectors are appreciated for their flexibility to fit customer specifications. Our Design team is able to propose versions answering to your needs. Reinforcements can be applied in case of use in harder climatic, ergonomic and electromagnetic conditions. Caps and backshells can also be improved to bring a better ergonomics on your configuration.

## ◆ EMC reinforcements

Conductive spring 360°

MMC standard receptacles are equipped with a ground ring giving a high EMC level. This function developed by Bernier brings a better continuity between the connectors shells and a protection on 360°

Conductive Orings

The receptacle Fluorosilicon Oring can be switched to a conductive version to establish a better conductivity between the connector and the panel.

Ground pins

One or several ground pins inserted in the connector shell can be set to link the chassis ground directly to the PCB.

## ◆ Climatic and mechanical characteristics

	MMC
Unlocking system	Axial Force ( $40N \leq F \leq 70N$ )
Operating temperature range	-55°C to + 125°C
Endurance	5 000 Operations
Sealing performance	IP68 (connected and disconnected)
Corrosion resistance	Salt fog : 96 hours (Stainless steel)
Fluids resistance	Oils and hydrocarbons

## ◆ Electrical characteristics

	MMC Version (24 contacts)
Working voltage	60 V <sub>max</sub>
Current rating per contact	2 A <sub>max</sub>
Gauge (AWG)	24
Contact types	Soder cup / For PCB
Contact resistance	≤ 8 mOhms
Insulation resistance	>1000 MOhms
EMI RFI Protection	Yes

## ◆ Material and plating

	Matériau	Plating
Connector shell	Stainless steel	Sandblasting
Insulator	Thermoplastic	-
Contacts	Copper alloy	Gold over nickel
Backshell shell	Aluminium	Black chrome

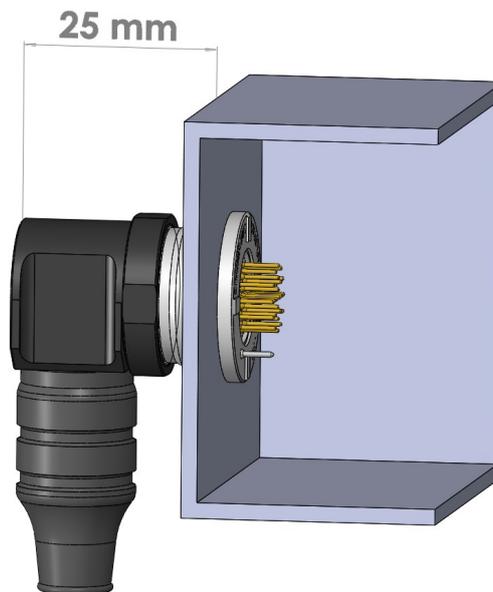

## ◆ Weight

Description	Weight (Max)
Receptacle	10 g
Plug	7 g
Extension	9 g
90° Elbow backshell	13 g

Standard material

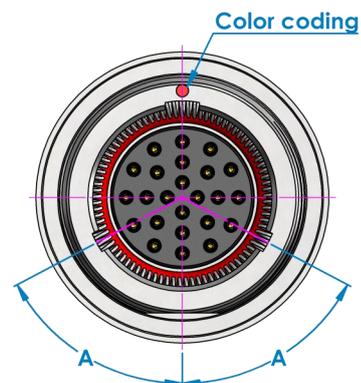

MMC

## ◆ Low Profile Dimensions

## ◆ Keyway

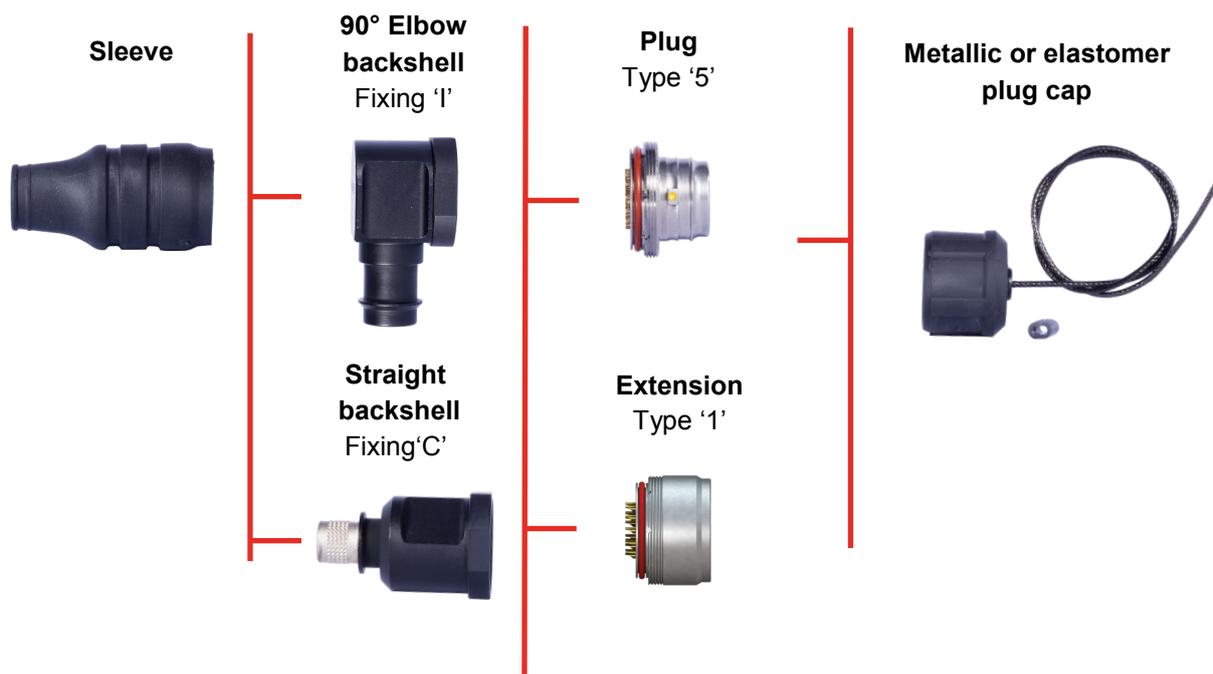

Keyway	Angle A	Color
K	70°	Orange
N	62°	Red
W	54°	White
X	46°	Green
Y	38°	Yellow
Z	30°	Blue

'T' tool version without keyway can mate all keyways.

◆ **Items mounted on cable**

MMC

◆ Items mounted on panel

Thermoplastic or elastomer  
receptacle cap

Receptacle  
Type '7'

## ◆ Connectors

MMC

## ◆ Tools for receptacle

Description	Part number
Tightening key	MMC CGA001

MMC CGA001

## ◆ Tightening torque

Connector material	Torque
Stainless steel	9 N.m
Aluminium	6 N.m

## ◆ Cabling tools

Tools for backshell mounting	Part number
Crimping jaws for backshell MMC type 'I'	MMC MNA001
Metallic clamp crimping tool for backshells type 'C'	BOU00MESE02 or 03
Key for the tightening of the backshell ring	MMC CGA02

## ◆ Assembly of backshell MMC RDBI + backshell end MMC MAI-XX on cable

MMC

1

- Prepare cable and backshell items
- Solder the cable wires on the connector contacts

2

- Tighten (with the recommended torque) the backshell on the connector.
- Bring the assembly 'Ferule-shield-cable' in position inside the backshell pulling on the cable.
- Proceed the crimping operation following the datasheet and the recommended tools.

3

- Bring the Orings and the elastomer sleeve in position.

## ◆ Assembly of backshell MMC RDBC-XX

1

- Prepare cable and backshell items (metallic clamp and heat shrink boot not included in the backshell part number)
- Solder the cable wires on the connector contacts

2

- Tighten (with the recommended torque) the backshell on the connector.
- Tighten the metallic clamp to fix the cable shield on the backshell knurled area.
- Cover with a heat shrink boot, a molded part or proceed an overmolding operation.

**CMA Serie**  
Push-Pull / Quick-Releaseable Connector

... For an optimum data transfer in harsh environments !
