Sensors

## Who We Are

Over 400 years of combined **engineering excellence**

### Broad Portfolio

DwyerOmega offers over 300,000 state-of-the-art products engineered in the U.S. for process measurement and control of temperature, humidity, pressure, strain, force, flow, level, pH, conductivity, and indoor air quality.

### Globally Trusted

As a trusted global leader in manufacturing innovative instrumentation solutions, our manufacturing facilities extend across the U.S., and our sales offices span the globe. This widespread presence underscores our commitment to meeting customer demands on a global scale.

### Engineering Support

Our team of engineering experts helps our customers select technical - and often uniquely configured - product solutions for their unique applications.

# From **Aerospace** to **Universities** and everything in between

Reaching a large base of customers in **industrial** and **academic markets** who want a convenient and reliable source for **products and systems**.
