

Flow & Level

With a large, diverse inventory of flow and level instrumentation designed to operate under harsh conditions for an extensive lifespan, DwyerOmega provides solutions for virtually any flow or level-related application.

Rotameters

Mass Flow Meters

Display Meters

Pump Controllers

Leak Detector

Level Indicators & Sensors

Non- & Contact Level Sensors

Turbine & Paddle Wheel Flow Meters

Flow & Level Switches

Level Transmitters

Flow Indicators

Valves

Insertion Electromagnetic Flow Meters

Control, Monitoring & IIoT

DwyerOmega offers a diverse selection of data monitoring solutions and control systems. Expertly designed devices such as out chart recorders and panel meters can log and visualize connected sensor data while our ecosystem of wired and wireless sensors and gateways can help integrate an Industrial Internet of Things (IIoT) environment into your application.

Data Loggers & Recorders

Signal Conditioners

Wireless Gateways

Meters & Controllers

Relays & Timers

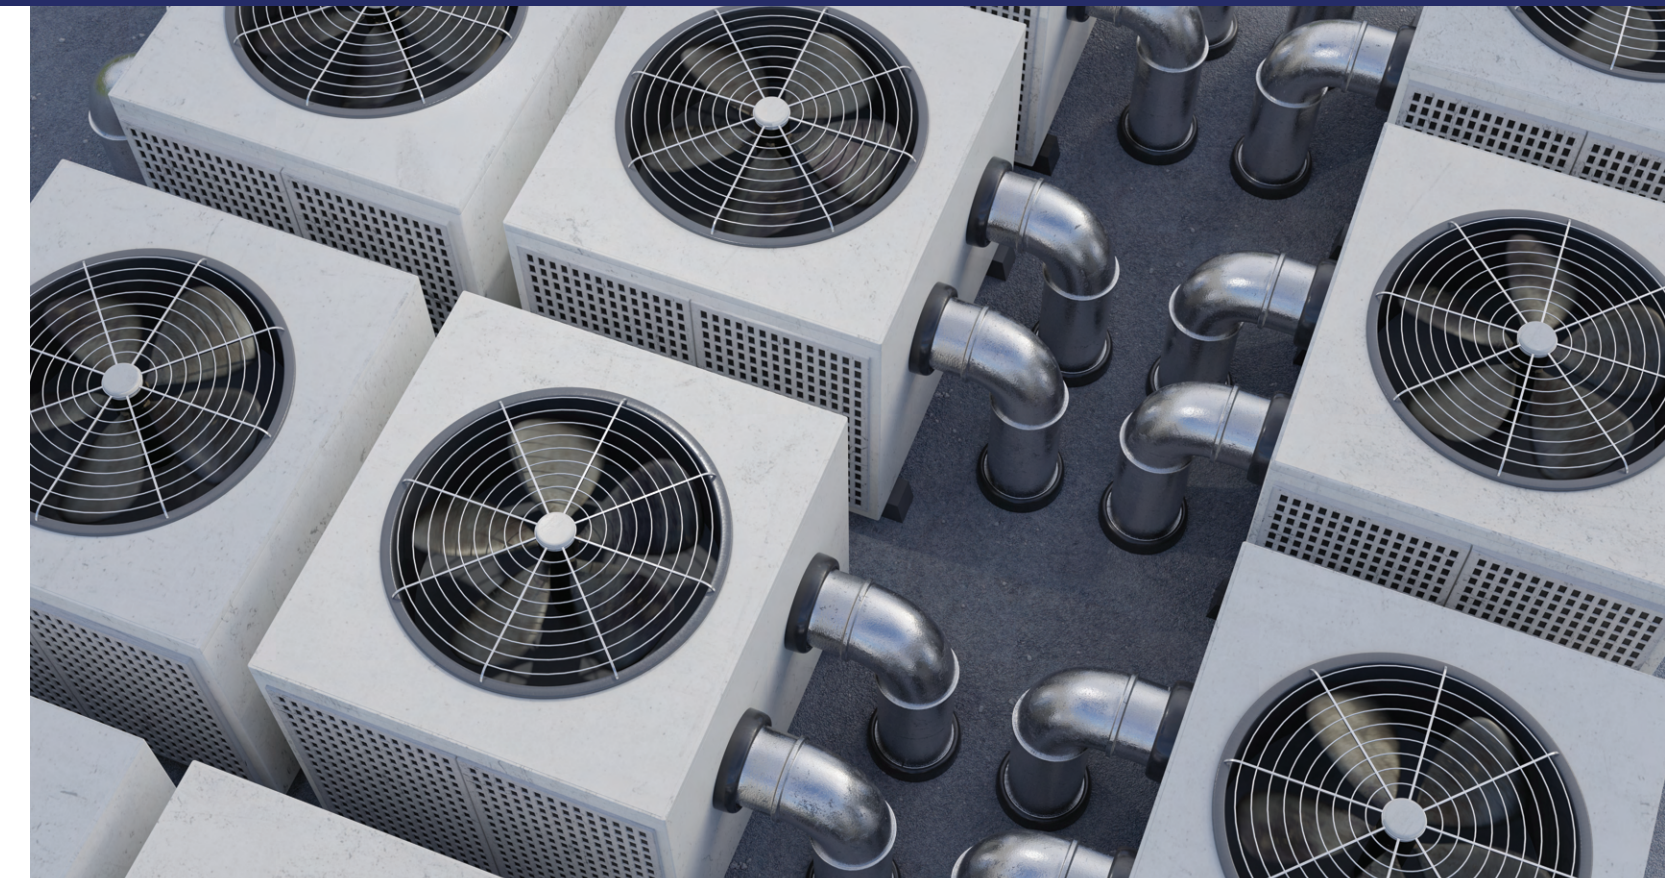

Network Transceivers

Wireless Sensors

Our Brands

DwyerOmega is a manufacturer and global provider of precision measurement solutions that improve efficiency, safety, and sustainability for all our customers. We offer a comprehensive selection of cutting-edge sensors and instruments for a diverse range of industrial and controlled environment applications.

Improving the world, one measurement at a time.™

LINE CARD

Temperature

DwyerOmega offers a comprehensive selection of high-quality temperature measurement devices ensuring we can provide a sensing solution for virtually any temperature monitoring-related application.

Thermocouples

RTDs

Thermistors

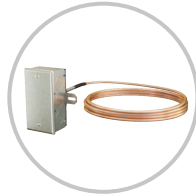

Infrared

Non-Invasive Sensing

HVAC Duct Sensors

Averaging Sensor

Vapor Thermometers

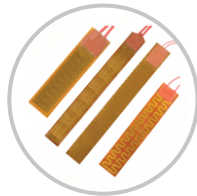

Wire & Cable

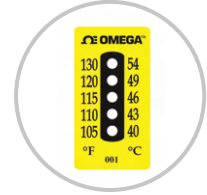

Connectors & Panels

Thermowells

Heaters

Indicating Labels

Thermometers

Sanitary Probes

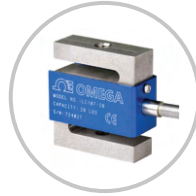

Pressure, Strain & Force

DwyerOmega offers a comprehensive selection of pressure, strain, and force measurement devices. From single and differential pressure to strain gauges and load cells, these devices are designed to be accurate and reliable – making them ideal for a wide range of industrial applications.

Transducers & Transmitters

Load Cells

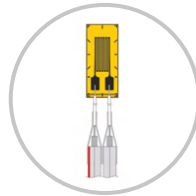

Differential Gages

Room Status Monitors

Pressure Switches

Strain Gages

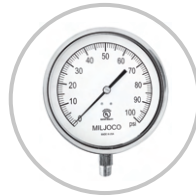

Manometers

Pressure Controllers

Single Pressure Gages

Lead-Free Gages

Pickup Ports

Pitot Tubes

Syphons & Snubbers

Regulators

Calibrators

Environmental Sensing & Testing

DwyerOmega offers a comprehensive selection of calibration and measurement test equipment designed to support quality diagnostics in a variety of applications.

HVAC Test & Measurement

pH Sensors & Controllers

Benchtop Calibrators

Indoor Air Quality

Temperature & Humidity

Pocket Test Thermometers

Handheld Thermal Infra-Red

Power Meters

Gas Detection

Anemometers & Wind Tunnels

Current Transformers & Switches
