MEDICAL

Our control solutions meet the stringent demands of medical-related equipment, providing superior performance and high cycle life - up to 10 million cycles. Precision testing ensures that our glove-friendly controls are rated up to IP69K and can handle demanding applications. Quality adheres to ISO 9000 standards and our products are designed to be easy-to-clean, disinfected and are highly customizable.

OTTO has been a responsive partner in the fight against the Covid-19 pandemic, creating products for critical medical applications such as ventilators, laboratory test equipment, mobility equipment, remote surgical equipment, and disinfecting devices.

For more than 60 years, OTTO has been designing and manufacturing precision switches and operator controls for the most demanding applications. OTTO has a broad range of standard and custom products, including traditional snap action switches, Hall effect technology and grips. OTTO excels in providing value-added services to meet our customers' needs by managing every phase of the project from conceptual design to finished product. Onsite capabilities and expertise include product engineering, 3D printing, injection molding, stamping, milling, machining and full quality testing.

Complete custom interfaces incorporate various control products, plus LED indicators, keypads/touchpads, cable assemblies and additional electronic circuitry. From a basic switch to a sophisticated panel assembly integrating many components, the array of possibilities is endless.
